 The impact of the digital economy on labour relations
 Perspectives of European Social Law: the European pillar of social rights.
 Business and human rights.

Scientific and technological offer

Development of indicators to evaluate social policies related to immigration and family, as well as educational policies from the point of view of human rights.

Issuing opinions and ongoing online consultations with universities and institutions that collaborate with the Chair.

Creation of educational material related to the activities of the Chair.

Design and delivery of training programmes addressed to managers, trainers and social agents, about the human rights-based approach applied to policies on migration, minorities, family, education, management of cultural diversity and the fight against poverty.

Internship programmes for university students at international institutions for the protection of human rights.

Design, advice and support for development cooperation programmes intended for democratic governance and the strengthening of civil society. Priority actions: training in human rights and promotion of participation in the development processes of especially vulnerable groups: women, young people, minorities and migrants.

Advice, design and evaluation of public education and social policies (migration, women, children and young people) with human rights based indicators (Human Rights Impact Assessments).

Advice, design and evaluation of the strategic management of Corporate Social Responsibility (CSR) / Core Business.

Training in the processes of design, planning and evaluation of social intervention projects.

Training programmes in leadership and intercultural competence.

Training programmes in economic, social and cultural rights with a specialisation in cultural rights.

Training and advice on the design and alignment of public policies consistent with Agenda 2013 and the Sustainable Development Goals (SDGs).

Training and advice in decision-making processes and conflict resolution in VUCA environments (dominated by volatility, uncertainty, complexity and ambiguity).
